What is Electrolyzed Water?

Electrolyzed water is produced by the electrolysis of ordinary tap water containing dissolved sodium chloride. It can be used for deodorization, cleaning, and sanitation of homes, hospitals, schools, vehicles, and gyms.

It generates hypochlorous acid (HClO) through the electrolysis of water decomposing into oxygen and hydrogen.

Hypochlorous acid is the same liquid used to sanitize airplanes and offices.

Hypochlorous acid is 100% safe for humans. It is the chemical-free, non-toxic, and all natural way to clean and sanitize.

BEWS-200

Hydro-Defense

Suggested Usage

BABY ITEMS

Feeding bottles, fabric dolls, plastic toys, play areas, walkers, car seats.

After spraying, wash and rinse under running water or wipe it off with a dry cloth.

PET ITEMS

Cushions, pet toilet pads, dog or cat beds, plastic or plush toys.

Wipe off excess wetness with a dry cloth if needed.

PERSONAL ITEMS

Coats, laptops, belts, gym bags, mouse pads, car keys, bottom of shoes.

Read manual for use with leather goods.

HOUSEHOLD ITEMS

Washing machine, appliances, sofa, kitchen, bathroom, door knobs.

Note: Do not spray directly on to face.

TIPS

Use electrolyzed water on dry cloths to create your own sanitizing wipes while on the go.

Pour some electrolyzed water into a small (2 oz.) spray bottle for portability and convenience. Use it to sanitize surfaces on-the-go such as, your hands, restaurant tables, shopping carts, door handles, cell phones, etc. Once the electrolyzed water is created, its sanitation power remains for up to 3 days.

Fine mist injection sprayer

Semi-automatic spray makes it easier to use and the fine mist from the spray makes it more effective at deodorizing, cleaning and sanitizing.

Microbubble technology with the triple deodorizing, cleaning and sanitation function.

Chemical free product that can remove 99.9% of harmful bacteria and viruses

Mega mesh triple layered electrodes.

With the triple layered mega-size electrode, it can generate highly efficient electrolyzed water which is hypochlorous acid.

Tritan material.

Eco-friendly material that has a clarity, toughness, heat resistant, Chemical resistant and BPA free.

3 levels of settings available to choose from

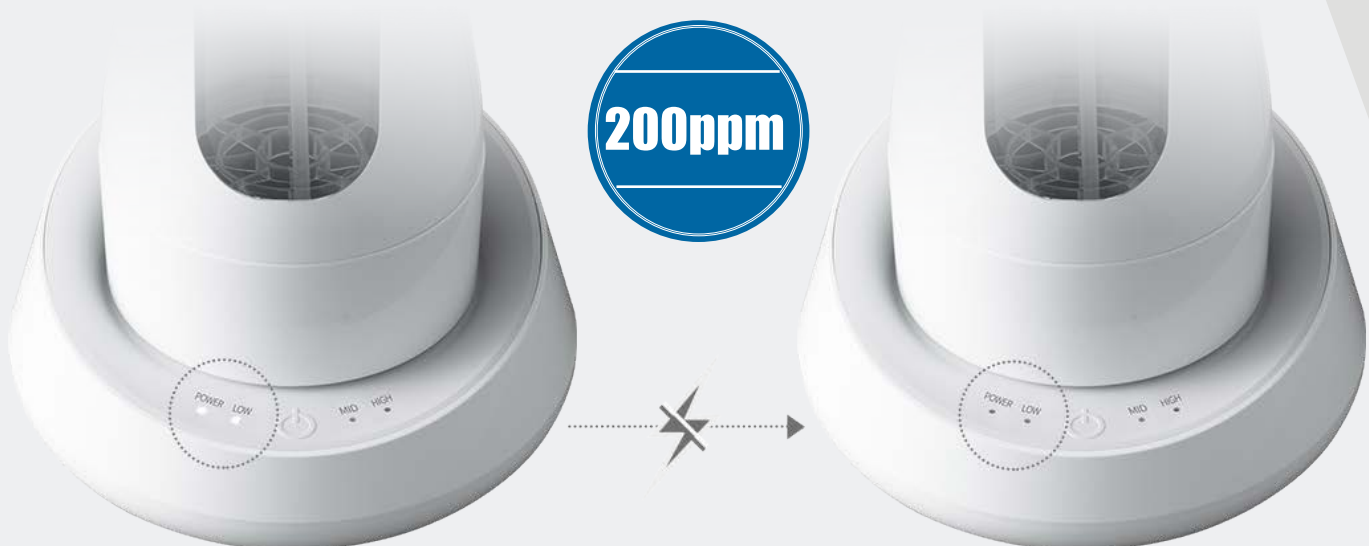

The mode('LOW'/'MID'/'HIGH') can be changed by single touch of 'POWER' button.

More powerful electrolyzed water can be made by adding one measured spoon (0.5g included) of refined salt.

Smart Control Technology

To prevent the generation of high-density electrolyzed water, the over-current detection control system is adapted to ensure the generation of safe electrolyzed water at all times.

In order to maintain the proper level of sanitized water concentration, it automatically turns off the power when the electrolyzed water reached a concentration 200 ppm.

Convenient and hygienic structure

The electrode module can be easily disassembled to allow for easy cleaning of the spray bottle.

Simple operation

STEP 01

Fill the spray bottle with 450ml of tap water.

STEP 02

If you wish to add salt, please ensure you use the correct amount per spray bottle.

STEP 03

Shake the spray bottle to dissolve the salt and assemble.

STEP 04

Put the assembled spray bottle on the base.

STEP 05

Touch the Power button to select the desired mode.
※ The process of generating electrolyzed water starts within 3 seconds after selecting the mode.

STEP 06

Spray the electrolyzed water after the process of generating the electrolyzed water is over.

3 different operating settings are possible.

Deodorizing (LOW)
Cleaning (MID)
Sanitizing (HIGH)

Smart control technology.

Turns off the power automatically when the electrolyzed water reaches a concentration 200 ppm.

High-capacity electrolyzed water.

450ml spray enables you to generate a large capacity of electrolyzed water.

Specifications

Product Name	Electrolyzed Water Sanitizer	
Model no.	BEWS-200	BEWS-210 (Sold Separately)
Rated Power	100V~240V 50Hz, 60Hz	
DC Output	9V/3A	
Dimensions(W x D x H)	BASE : 137(W) x 137(D) x 67(H) mm SPRAY BOTTLE : 90(W) x 90(D) x 275(H) mm	PITCHER BOTTLE : 115(W) * 175(D) * 238(H) mm
Weight	BASE : 210g SPRAY BOTTLE : 285g	PITCHER BOTTLE : 471g
Capacity	450mL	1.25L
Material	BASE : TRITAN(PCT), ABS, TRANSPARENT ABS, SILICONE SPRAY BOTTLE : TRITAN(PCT), ABS	PITCHER : TRITAN(PCT), ABS

FDA
Registered

BEWS 200 Electrolyzed Water Generator
passed the standard for
FDA registration (medical device).

CE
Certification

BEWS 200 Electrolyzed Water Generator
has **CE certification** that
meets EU safety, health and
environmental protection requirements.

ETL
Certification

BEWS 200 Electrolyzed Water Generator
passed the standard for
ETL Certification.
